

If you have online accounts (like shopping, banking, or social networking), it's worthwhile to record and securely store your basic information in FidSafe®. That way, if you ever forget anything, or want to share that information with people you trust, it's easy to find.

Consider using the password safe within FidSafe to keep passwords to these accounts separate and protected.

## To Do:

1. Fill out and save the form below
2. Upload a copy to your FidSafe
3. Consider sharing it with a trusted Contact

## Having Trouble?

Make sure you have the latest version of [Adobe® Reader®](#) installed on your computer.
